

Themes

A library of different themes can be created for use with your communications, you could choose to just use one style for all of your communications or could create a number of different ones for perhaps different departments of your business or different types of communications. A theme can be created by selecting **Themes** from the main mHub Navigation. A theme is made up of a header logo, a background image and a palette of colours (see below).

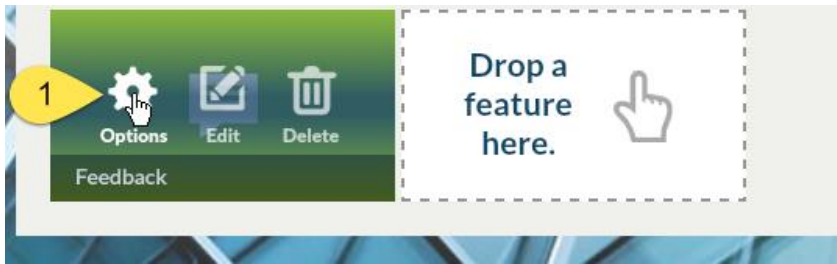

- 1) **Header Logo** (see 1 above) – Maximum logo **width is 940px**, there is no restriction on logo height. The white space above and below the logo needs to be designed into the logo file, we recommend saving logos that require a transparency as a PNG file. However, GIFs and JPGs and can be used. Recommended file size approx. 200k.
- 2) **Background** (see 2 above) – A background image can be set as part of your theme, you can use any size but we recommend a minimum size of 1280px wide x 768px high. For optimum results a background of **1920px x 1080px** can be used which will ensure there is no loss of quality on large screen sizes. JPG, GIF or PNG format, recommended file size approx. 600k.

Tile Images

Feature tiles are by default populated with colours from the selected theme, but you can also insert a unique images for each tile by clicking on the 'Options' button (see 1 below) when using any of the main content editors.

- 1) **Small Feature Tile** – This tile size appears within Simple Microsites and Simple and Advanced Presentations. Images used in this tile can be any size but for optimum results and perfect placement a size of **221px wide x 123px high** is required (see 1 below). JPG, GIF or PNG format, recommended file size approx. 50k per image.

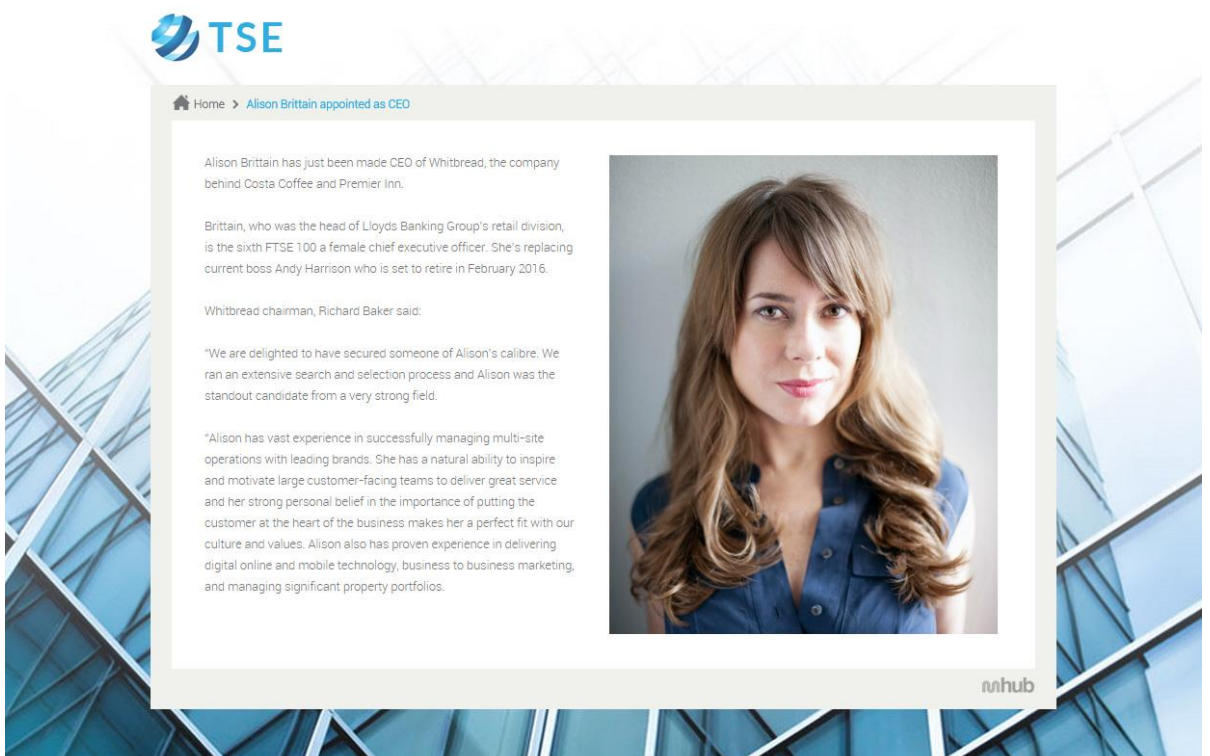

Continued...

- 2) **Large Feature Tile** – This tile size appears within Advanced Microsites only. Images used in this tile can also be of any size but for best results an image size of **221px wide x 250px high** is required (see 2 below). JPG, GIF or PNG format, recommend file size approx. 100k per image.

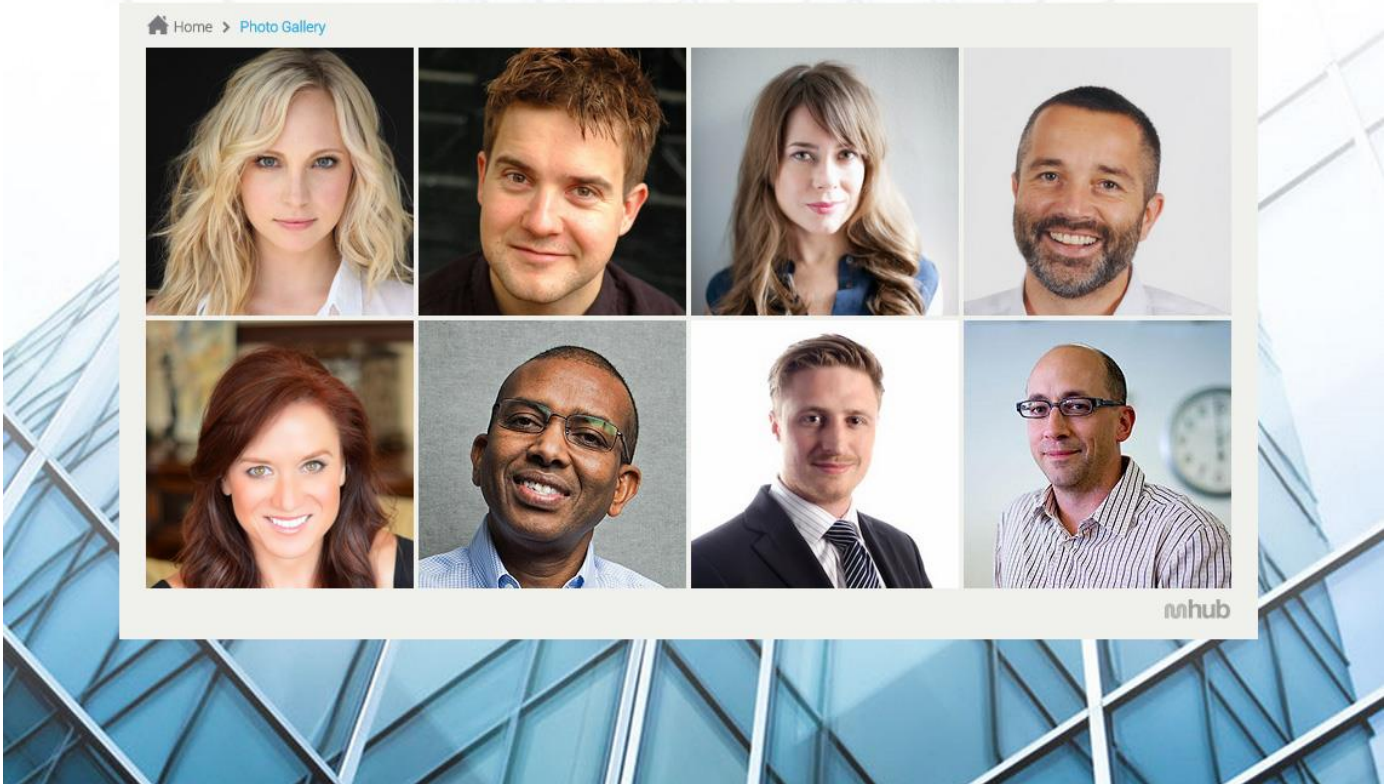

In Page Images

- 1) **Text & Image Feature** – Images used within this feature can be of any size but for best results limit the width to **403px**, there is **no restriction on height** (see below). JPG, GIF or PNG format, recommended file size approx. 200k per image.

- 2) **Photo Gallery Feature** – Images used within this feature can be of any size but for the best results limit each photo to **500px wide x 500px high** (see below). JPG, GIF or PNG format, recommended file size approx. 100k per image.

If you have a question or something is not quite clear please let us know by emailing support@mhub.tv.

End.
